## JACARANDAS INTERNATIONAL

### Essential Oils Producer from Madagascar

For over **20 years**, Jacarandas has been dedicated to producing high-quality essential oils and aromatic ingredients, **100% sourced and crafted in Madagascar**. Our expertise lies in mastering raw materials, maintaining full traceability, and ensuring sustainable and ethical production from field to bottle.

We work closely with a network of more than **1,300 certified producers** across **9 regions**, cultivating strong partnerships rooted in trust and shared values. Our certified organic production has been in place since 2006, and we proudly comply with European and US regulations.

From ylang-ylang and clove to pink peppercorn and ginger, our key products reflect the richness of Madagascar's biodiversity. Every drop tells the story of a responsible supply chain that promotes reforestation, organic farming, and fair trade.

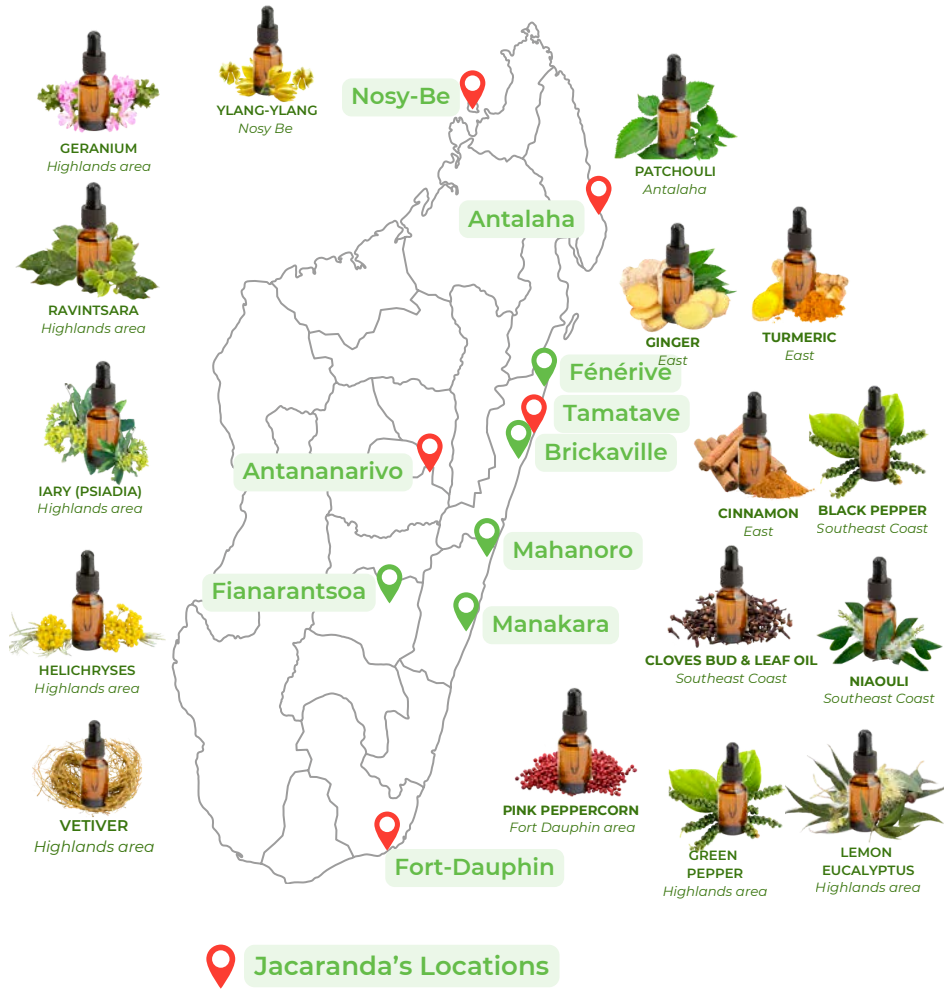

At Jacarandas, we believe in long-term impact — for people, for nature, and for future generations.

# Black Pepper

## Black Pepper *Piper nigrum*

Applications

Flavour

Fragrance

Fragrance	Color	Molecular analysis
Pungent, spicy, woody, warm, slightly citrusy	Colourless to bluish	(E)- $\beta$ - caryophyllene : 10% to 33.7%, limonene : 10,8% to 27%, $\alpha$ -pinene : 8,4% to 26%, $\beta$ -pinene : 0,5% to 18 %

*"Resilience in a bottle."*

Sourced from Madagascar's Farafangana region, this warm and invigorating essential oil is a symbol of resilience against climate change. It adds spice and depth to perfumery while supporting farmer communities.

# Cinnamon Bark

## Cinnamon Bark

*Cinnamomum zeylanicum*

Applications

Flavour

Fragrance

Fragrance	Color	Molecular analysis
Powdery, spicy, warm, indulgent	Pale yellow to dark yellow	Cinnamaldehyde : 55% to 80%, Cinnamyle Acetate : 4,2% to 15,2%, Eugenol : 4% to 10%

*"Soft, sweet, and delicate."*

Ceylon cinnamon bark oil is prized for its gentle aromatic profile. With subtly sweet and refined notes, it brings warmth without heaviness, adding sophistication to both gastronomy and premium fragrance applications. Its delicate balance of spice and sweetness makes it a versatile treasure, enhancing creations with elegance and comfort.

Also available :

# Clove Bud

## Clove Bud

*Eugenia caryophyllata*

Applications

Oral Care

Fragrance

Aromatherapy

Fragrance	Color	Molecular analysis
Spicy, warm, medicinal, indulgent, slightly sweet with hints of chocolate and vanilla	Pale yellow to dark yellow	Eugenol: 75% to 87%, $\beta$ -caryophyllene: 2.7% to 7%, Eugenyl acetate: 4% to 15%.

Clove buds are a vital source of income for our farmers partners. It allows the farmers to ensure revenues during off-peak season. Clove is an historic products of Jacarandas : we work on define the best olfactory quality.

# Clove Leaf

## Clove Leaf

*Eugenia caryophyllata*

Applications

Oral Care

Household

Fragrance	Color	Molecular analysis
Spicy, slightly vanilla-like, medicinal	Yellow to light brown	Eugenol : 85%, $\beta$ -caryophyllene :4% to 17%, Eugenyl acetate : 0.1% to 1%

Clove leaf essential oil is a powerful antiseptic, anti-inflammatory and natural anesthetic. Furthermore, with its spicy, warm/woody notes and a hint of vanilla sweetness, it's highly valued in fine perfumery.

Also available :

# Eucalyptus citriodora

## Eucalyptus citriodora

### *Eucalyptus citriodora*

#### Applications

Aromatherapy

Household

Fragrance	Color	Molecular analysis
Aromatic, fresh, citrusy	Yellow	Citronellal 65% to 75%, Isopulegol 5% to 15%, Citronellol 2% to 7%

*"A breath of fresh air."*

With its crisp, lemony scent, Eucalyptus Citriodora brings a refreshing burst of clarity to any formulation. Widely used in aromatherapy and pharmaceutical preparations, it is valued for its soothing, purifying properties and its ability to energise both body and mind. Ideal for unisex blends, it adds a clean, vibrant note to fragrances and wellness products alike.

Also available :

# Fresh Ginger

## Fresh Ginger *Zingiber officinalis*

### Applications

Flavour

Aromatherapy

Fragrance

Fragrance	Color	Molecular analysis
Citrusy, slightly sweet, sparkling, spicy	Pale yellow	$\alpha$ zingiberene : 17% to 27%, $\beta$ -sesquiphellandrene : 6% to 12%, $\alpha$ -farnesene : 1.9% to 6.1%, Ar-curcumene : 4% to 12.5%, $\beta$ -bisabolene : 2.1% to 7.5%

*"Harvested, distilled, and perfected."*

Our fresh ginger oil is crafted from rhizomes distilled immediately after harvesting. Grown alongside organic turmeric, this dual farming model supports smallholder farmers while producing premium, spicy, and invigorating essential oil.

# Geranium

## Geranium *Pelargonium rosat*

### Applications

Skincare

Fragrance

Aromatherapy

Fragrance	Color	Molecular analysis
Floral, rosy, slightly sweet, green, citrusy	Yellow to green	Citronellol 18% to 26%, Geraniol 10% to 20%, Citronellyl formate 6.5% to 11%

*"Soft, fresh, and refined."*

Geranium's delicate green and rosy notes add subtle sophistication to perfumes. It strikes the perfect balance between softness and elegance, making it a versatile must-have for fragrance lovers.

Also available :

# Green Pepper

## Green Pepper *Piper nigrum*

Applications

Fragrance

Fragrance	Color	Molecular analysis
Fresh, green, spicy, peppery, woody, warm, slightly citrusy.	Pale yellow to greenish-yellow.	Rich in monoterpenes and sesquiterpenes, mainly $\beta$ -caryophyllene, limonene, $\beta$ -pinene, $\alpha$ -pinene, $\delta$ -3-carene and sabinene.

*"A burst of green vitality.."*

Distilled from freshly harvested green peppercorns in Madagascar, this vibrant essential oil offers a fresh, spicy and subtly citrusy profile, with a distinctive green character. Valued in flavour and fragrance compositions, it brings brightness, warmth and natural complexity, while reflecting the richness of Madagascar's biodiversity and supporting local producer communities.

# Helichrysum Bracteiferum

## *Helichrysum bracteiferum*

### Applications

Aromatherapy

Cosmetics

Fragrance	Color	Molecular analysis
Bitter, herbaceous, woody, honeyed, camphoraceous	Colourless to pale yellow	Oxides (1.8 cineole 20%), monoterpenes ( $\alpha$ - and $\beta$ -pinenes 15%, limonene, sabinene, $\gamma$ -terpinene...), monoterpenols (terpinene 4-ol 1.5%, linalool), sesquiterpenes ( $\beta$ -caryophyllene 9%, $\alpha$ -humulene 12%, germacrene D 3%...), sesquiterpenols, aldehydes.

Helichrysum bracteiferum essential oil offers a woody and earthy fragrance, with notes of honey and camphor. Its olfactory bouquet evokes wild and rustic landscapes, bringing a sensation of warmth and comfort.

Used in fragrances, it adds a terrestrial and robust dimension to compositions, providing a solid and enchanting base.

# Helichrysum Bracteiferum

Also available :

# Helichrysum Gymnocephalum

## Helichrysum Gymnocephalum *Helichrysum gymnocephalum*

Applications

Aromatherapy

Fragrance	Color	Molecular analysis

*"Earth's elegance, rooted in Madagascar."*

Cultivated in Madagascar's rich soils, Vetiver is prized for its deep, woody and earthy character. Renowned as a cornerstone of fine perfumery, it brings depth, warmth and long-lasting fixation to fragrance compositions, while supporting sustainable livelihoods for farming communities.

Also available :

# White Ylang-Ylang

## White Ylang-Ylang *Cananga odorata*

### Applications

Fragrance

Cosmetics

Aromatherapy

Fragrance	Color	Molecular analysis
Floral, delicate, saltier, fruitier, and more sun-warmed than Ylang Ylang	Very pale yellow	P-Cresyl: 3.5 to 4.7 Germacrene D: 21 to 25 $\alpha$ -farnesene: 8 to 10

*"An exclusive Jacarandas treasure with a fresh, delicate touch."*

White ylang-ylang is a Jacarandas exclusive, crafted through precise steam distillation to capture its uniqueness. This captivating flower, so significant in the fragrance world, has been beautifully diversified to offer a new olfactory experience. The notes of white ylang-ylang essential oil are refined, fresher, and more delicate compared to the classic variety, which remains equally exquisite and captivating. This lighter essence brings a fresh and elegant dimension to fragrant compositions, making it a prized ingredient for sophisticated perfumers.

Also available :

# Ylang - Ylang

## Ylang - Ylang *Cananga odorata*

### Applications

Fragrance

Cosmetics

Aromatherapy

Fragrance	Color	Molecular analysis
Floral, opulent, enveloping, sensual, sun-warmed	Yellow	Germacrene-D : 10% to 22%, $\beta$ -caryophyllene : 7,5% to 18,6%, Linalol : 3,7% to 11,26%

*"The essence of purity, depth, and complexity."*

At Jacarandas, fresh ylang-ylang flowers are distilled on-site shortly after picking to preserve the full purity and power of this extraordinary oil.

We offer Ylang-Ylang essential oils in the following grades:

- Qualities I, II, III, and Complete
- Available in both conventional and organic-certified options

This divine essence adds unmatched depth and complexity to perfumed compositions, making it a timeless treasure in natural perfumery.

### OUR IMPACT

A photograph of two women in a lush green field, likely a vanilla plantation. The woman in the foreground is wearing a colorful orange and blue patterned dress and a red and blue headwrap. She is holding a bunch of yellow vanilla flowers in her left hand and a wooden stick in her right. The woman in the background is wearing a white top and a blue vest, and is also working with the plants. The background is filled with green leaves and branches of trees.
